

# **DTSC670: Foundations of Machine Learning Models**

## **Assignment 4**

### **Directions**

Download all assignment materials and ensure they are located in the same folder. Complete the assignment4.ipynb file; further directions are located in that file.

### **CodeGrade**

Note that this assignment will be automatically graded through CodeGrade and you will have unlimited submission attempts.

When submitting to CodeGrade, your notebook should be named `assignment4.ipynb` and there should be no errors in the file or CodeGrade will not be able to grade it. Before submitting, I suggest that you restart your kernel and attempt to run all cells again to ensure that there will be no errors when CodeGrade runs your script.
